To Whom It May Concern;

Motion to Intervene.

I recently received the Public Notice of Hearing concerning the necessity to file a motion to intervene. This is concerning the "Application" for approval of a Certificate of Convenience and Necessity (Certificate) by William (Bill) James Parker, of Mountain Glenn Water Service. In the letter it said that I must contact you in order to be an "intervener". I am therefore notifying you of my intent to be such an intervener with the publication of this letter. My concern is very simple but to the point, I am an owner of property at the end of Cardinal Drive in Pinedale. It is the property bordered by the Taylor turnoff on the South end and the National forest on the North. I have built on the property and installed my own well, at considerable personal expense, to provide my own supply of water. Therein lies my dilemma, I do not want any part of any water provider and I do not want to have to sign up with any provider if I decide to sell or give part of the property to my children or if I decide at some time in the future to sub-divide. I want to remain the provider of the water to this land as an option to anyone who holds title to all or any portion of the land now and at any time in the future. I have invested my own time and money in order to accomplish this and wish to retain this right.

Please notify me of any further changes or information available concerning these proceedings.

I Remain

Deborah Hilton
